

## Copyright Infringement Issues – June 25, 2009

### Green Dam Youth Escort Contains Portions of CYBERSitter Code

The following table contains the list of CYBERSitter proprietary files distributed by Green Dam. The Green Dam installation program tested was downloaded on June 9, 2009. Green Dams developers first broke our DRM (Digital Rights Management) mechanisms, then changed the file extension of each file from .DLL or .DRV to .DAT. The files were then encrypted with a new Green Dam encryption technique.

Green Dam Version	CYBERSitter Version	Description
adwfil.dat	adwfil.dll	Adult topics – pornography (see example below)
auctfil.dat	auctfil.dll	Online auction sites
bnrfil.dat	bnrfil.dll	Banner ads
bsnlst.dat	bsnlst.dll	Bad serial number list (see example below)

wrestfil.dat	wrestfil.dll	Wrestling sites
wzfil.dat	wzfil.dll	WareZ/Illegal software sites

The file names in red above are still contained in the most recent release of Green Dam (v3.17) as of June 25, 2009. These remain despite the fact that the Green Dam developer removed several CYBERSitter files from the June 9, 2009 distribution version.

The current Green Dam installation program was created by the freeware version of Setup2Go. In examination of the Green Dam setup file, specific references can be found to these files. These references direct the installer to install the pirated CYBERSitter files into the ..\Windows\System32 directory. The following lines were extracted from the Green Dam installation program.

```
,13,%WinSysDir%\jawfil.dat,1,0,32  
,14,%WinSysDir%\lgwfil.dat,1,0,32  
,15,%WinSysDir%\vgamfil.dat,1,0,32  
,16,%WinSysDir%\adwfil.dat,1,0,32
```

Contrary to statements made by Green Dams developer that these were just “lists of international pornographic sites”, the code lines shown above are code snippets that tell CYBERSitter (and Green Dam) how to handle word combinations when found in URLs, search queries, or page content.

Green Dam distributes an encrypted file called `csnews.dat`. The decrypted content of this file is as follows:

May 10, 2004

If you haven't got a SpyWare checker for your computer  
yet, now is the time. SpyWare is installed by numerous  
freely downloaded programs, especially peer to peer file  
and music sharing programs. These types of programs can  
literally turn your computer into an unusable machine.  
It can cost you hundreds of dollars in repair costs.  
Our best advice: Never download file or music sharing  
programs. Always read every single word on the screen  
when installing a free program from the internet. If  
you see anything that indicates that the program is  
going to install any additional "enhancement" programs,  
abort the installation immediately.

how to get rid of it, please visit:

CYBERSitter also distributes an encrypted version of this file, using a different encryption method than Green Dam, called `csnews.dll`. This was used in older versions of CYBERSitter to deliver information to the end user regarding updates to the product as well as security advice as shown in the screen shot below. It is still distributed today with the same information to maintain compatibility with old versions of CYBERSitter still in use.

Green Dam distributes an encrypted file called `bsnlst.dat`. The decrypted content of this file is as follows:

```
1089-1782-1386-1188
1188-1881-1485-1287
1287-1980-1584-1386
1386-2079-1683-1485
1485-2178-1782-1584
1584-2277-1881-1683
1683-2376-1980-1782
1782-2475-2079-1881
1881-2574-2178-1980
2277-2970-2574-2376
2277-2970-2574-2376
```

CYBERSitter also distributes an encrypted version of this file, using a different encryption method than Green Dam, called `bsnlst.dll`. The contents of the CYBERSitter version and the Green Dam version are identical. The file name `BSNLST` is an acronym for “Bad Serial Numbers List”. This is a list of CYBERSitter serial numbers posted at various illegal “crack” sites and is distributed as part of the CYBERSitter package so that the program can refuse to register if one of these serial numbers is used.
